SUMMARY OF RESULTS

- The S&P Persistence Scorecard attempts to distinguish a manager's luck from skill. One key measure of successful active management lies in the ability of a manager to outperform his peers consistently.
- **This report's results show that, irrespective of asset class or style focus, few fund managers consistently outperformed their peers.**
- For funds categorized as top performers in September 2017, 47% maintained their top-quartile performance the subsequent year. However, there was a dramatic fall in persistence afterward—**just 8% of domestic equity funds remained in the top quartile in the three-year period ending September 2019.** This result (8%) is consistent with the notion that historical performance is only randomly associated with future performance.¹
- Smaller-cap equity funds recorded lower persistence compared with results from six months prior—mid-cap persistence dropped to 7% from 14%, and small-cap funds sank to 11% from 23% (see Exhibit 1).

Exhibit 1: Performance Persistence over the Three-Year Period Ending September 2019 versus March 2019

Source: S&P Dow Jones Indices LLC, CRSP. Data as of Sept. 30, 2019. Chart is provided for illustrative purposes. Past performance is no guarantee of future results.

¹ Given that the universe is broken out into four quartiles, the random odds of a top-performing manager in year one staying in the top quartile in the subsequent two years can be computed as 25% * 25% = 6.25%.

- **An inverse relationship exists between the time horizon length and the ability of top-performing funds to maintain their success.** Less than 3% of equity funds in all categories maintained their top-quartile status at the end of the five-year measurement period. In fact, no large-cap fund was able to consistently deliver top-quartile performance by the end of the fifth year.
- Report 3 shows that over 44% of top-quartile large-cap managers from the first three-year period continued to show top performance in the second three-year period—a figure higher than what would be expected at random. Top-quartile mid- (30%) and small-cap (18%) funds did not fare as well.
- For the five-year transition matrix, 32% of top-performing equity funds in the first period remained in the top quartile in the second period. However, 20% of top-quartile funds also moved to the lowest quartile, and an additional 8% of funds were merged or liquidated, highlighting that it was almost as likely for a top-quartile fund to falter than it was to remain in the top quartile.
- **Fourth-quartile funds were most likely to be merged or liquidated across categories over the five-year horizon.** This supports the view that underperformance typically precedes a fund's closure.
- Top-quartile mortgage-backed securities funds demonstrated the best performance persistence among fixed income funds; 23% of managers maintained their top-performing status during the three-year period ending September 2019. However, this is a decline from the results six months prior (38%).
- **Over longer horizons, most fixed income categories showed no persistence:** Of the 13 fixed income categories, seven showed no managers remaining in the top quartile over the five-year horizon.

ABOUT THE PERSISTENCE SCORECARD

The phrase “past performance is no guarantee of future results” (or some variation thereof) can be found in the fine print of most mutual fund literature. Yet many investors and advisors consider past performance and related metrics to be important factors in fund selection. So does past performance really matter?

To answer this question, the semiannual S&P Persistence Scorecard tracks the degree to which historical relative performance is predictive of future relative performance. As in our widely followed SPIVA® Scorecards, the University of Chicago’s Center for Research in Security Prices (CRSP) Survivorship Bias Free Mutual Fund Database serves as our underlying data source.

S&P Dow Jones Indices is one of the world’s leading index providers, maintaining a wide variety of investable and benchmark indices to meet an array of investor needs. Our Global Research & Design team is dedicated to conducting unbiased, in-depth analysis on a broad range of topics and issues facing investors in today’s marketplace. This scorecard highlights performance persistence over three and five consecutive 12-month periods and two non-overlapping three- and five-year periods.

Key features of the S&P Persistence Scorecard include:

- **Historical rankings without survivorship bias:** For anyone making an investment decision, all funds available at the time of that decision are part of the initial opportunity set. Ignoring funds that liquidate or merge during a period of study biases measurements of persistence. Using the University of Chicago’s CRSP Survivorship Bias Free Mutual Fund Database, the S&P Persistence Scorecard ranks all funds available at each point in time and tracks the top-quartile and top-half performers throughout the time period.
- **Clean universe:** The mutual fund universe used in these reports comprises actively managed domestic U.S. equity funds. Index funds, sector funds, and index-based dynamic (bull or bear) funds are excluded from the sample. To avoid double counting multiple share classes, only the share class with the highest previous period return of each fund is used.
- **Transition matrices:** Transition matrices show the movements between quartiles and halves over two non-overlapping, three- and five-year periods. They also track the percentage of funds that have merged or liquidated. In addition, we monitor movements between capitalization levels. This helps us capture, for example, the conversion of some large-cap funds to mid- and small-cap funds.
- **Tracking reports of top performers:** The tracking reports show the percentages of funds that remain in the top-quartile or top-half rankings over consecutive three- and five-year periods.

DOW JONES, DJ, DJIA and DOW JONES INDUSTRIAL AVERAGE are registered trademarks of Dow Jones Trademark Holdings LLC ("Dow Jones"). These trademarks together with others have been licensed to S&P Dow Jones Indices LLC. Redistribution or reproduction in whole or in part are prohibited without written permission of S&P Dow Jones Indices LLC. This document does not constitute an offer of services in jurisdictions where S&P Dow Jones Indices LLC, S&P, Dow Jones or their respective affiliates (collectively "S&P Dow Jones Indices") do not have the necessary licenses. Except for certain custom index calculation services, all information provided by S&P Dow Jones Indices is impersonal and not tailored to the needs of any person, entity or group of persons. S&P Dow Jones Indices receives compensation in connection with licensing its indices to third parties and providing custom calculation services. Past performance of an index is not an indication or guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. S&P Dow Jones Indices LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice. Closing prices for S&P Dow Jones Indices' US benchmark indices are calculated by S&P Dow Jones Indices based on the closing price of the individual constituents of the index as set by their primary exchange. Closing prices are received by S&P Dow Jones Indices from one of its third party vendors and verified by comparing them with prices from an alternative vendor. The vendors receive the closing price from the primary exchanges. Real-time intraday prices are calculated similarly without a second verification.

S&P Global keeps certain activities of its various divisions and business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.
